

MEDIA RELEASE

ACT Integrity Commission mid-year operational statistics and Kingfisher operational timeline

17 March 2026

The ACT Integrity Commission today released its mid-year operational statistics for the period 1 July to 31 December 2025. The data provides an overview of the Commission's functions and activities during the reporting period, including the assessment of corruption reports, preliminary inquiries, and formal investigations undertaken.

Alongside the mid-year statistics, the Commission has published a consolidated timeline setting out all matters investigated, including litigation commenced against the Commission during the period in which Operation Kingfisher was active.

The timeline illustrates the volume and concurrent nature of the Commission's operational work, including the significant number of matters advanced during the time period. Not reflected in the timeline are the many corporate responsibilities of running the Commission and supporting the oversight of operations by the Inspector and the Standing Committee of the Integrity Commission and Statutory Office Holders.

The publication of both the mid-year statistics and the timeline supports the Commission's commitment to enhancing knowledge of its operations and outcomes and provides the community with a clear overview of the Commission's operational workload over time.

Both documents are available on the Commission's [website](#).
